

Junaidh Haneefa Muhammedhaneefa

Full-Stack & Mobile Developer

Dublin, Ireland | +353 89 253 4784 | junaidhhaneef.m@gmail.com | linkedin.com/in/junaidhhaneefa | github.com/junaidh-junu | junaidh.me

PROFESSIONAL SUMMARY

Full-Stack and Mobile Developer with 2+ years of production experience shipping 13 apps to both the Play Store and the App Store, including a flagship app with 30,000 active users and a 4.5-star rating. Strong expertise across Flutter/Dart, MERN/Next.js, and Kotlin — plus applied AI/ML where it matters: production RAG chatbots and explainable geospatial models (XGBoost, SHAP). Promoted from Junior Developer to Team Lead within 9 months, leading a 12-member cross-functional squad across 20 concurrent projects. Comfortable with monorepo tooling, CI/CD pipelines, OTA updates, and end-to-end cloud delivery. Immediately available.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Dart, Python, Kotlin, C, C++, SQL, HTML5, CSS3

Frontend: React, Next.js, Redux / Redux Toolkit, TypeScript, Responsive Design, REST API Integration, Mapbox

Mobile: Flutter, Dart, Jetpack Compose, BLoC, GetX, Riverpod, Provider, Offline-first Architecture, Google Play Store, Apple App Store

Backend: Node.js, Express.js, FastAPI, RESTful API Design & Development, Django, Flask, GraphQL

AI / ML: Explainable AI (SHAP), Geospatial ML, XGBoost, scikit-learn, RAG (Retrieval-Augmented Generation), ChromaDB, Gemini API, LLM Integration, Vector Search, Prompt Engineering, Pandas, NumPy, Jupyter

Databases: MongoDB, PostgreSQL, PostGIS, MySQL, SQLite, Firebase, Supabase, Prisma ORM

DevOps / Cloud: GitHub Actions CI/CD, Docker, DigitalOcean, Cloudways, Vercel, Netlify, Codemagic, Shorebird OTA Updates, WHM/cPanel

Tools: Git, GitHub, Figma, Postman, JIRA, ClickUp, Notion, Directus, Appwrite, Android Studio, Xcode

Methodologies: Agile, Scrum, Sprint Planning, Backlog Grooming, Code Review, CI/CD, TDD

WORK EXPERIENCE

IT Coordinator | New Leaf School For Quran And English | Remote

Jul 2024 – Present

Part-time · Puthucode, Palakkad, Kerala, India

- Sole point of contact for day-to-day digital issues; support teachers with tools, accounts, and classroom technology
- Train staff on the school's ERP software and related workflows; provide ongoing support so teachers can use existing systems confidently
- Build internal software tools for school operations (including an event manager) and maintain the public school website (React, Supabase) at newleafschool.org — events, notices, admin panel, and real-time updates
- Architecting and leading development of a school ERP from scratch to replace the legacy platform, covering admissions, attendance, exams, fees, and communications; PostgreSQL/Prisma data architecture, access-control design, and requirements gathering with school leadership

Full-Stack & Mobile Developer | Appetite Studio | Remote

Nov 2025 – May 2026

- Built Ente Ward civic engagement Flutter app serving 20 Kerala ward constituencies and 500 active users; led Flutter mobile app, React admin dashboard, and Supabase backend migration including PostgreSQL schema redesign, row-level security policies, and real-time data flows
- Shipped ToyCar Showroom as a cross-platform Flutter app (Google Play Store & Apple App Store) and web platform — user authentication, virtual garage, social features, leaderboards, and peer-to-peer digital asset transfers — reaching 100 active users post-launch

- Built QuantumX landing page and community-maintained database tracking post-quantum cryptography vulnerabilities — React frontend with TypeScript and Directus CMS backend
- Delivered end-to-end Flutter and Kotlin/Jetpack Compose mobile apps, handling full lifecycle from UI implementation to backend API integration and app store deployment

Team Lead & Full-Stack Developer | D4DX Innovations LLP | Kozhikode, India Mar 2025 – Oct 2025

- Promoted from Junior Developer to Team Lead within 9 months based on technical delivery and architectural contributions
- Led a 12-member cross-functional team using Agile/Scrum — facilitated daily standups, sprint planning, backlog grooming, and ~10 pull request reviews per week using ClickUp and Notion
- Architected the Tafheem ul Quran web platform end-to-end — React/TypeScript frontend, Express/Node.js RESTful API, SQL database with authentication, custom audio streaming service, and admin CMS — growing to 30,000+ active users with a 4.5★ Play Store rating
- Built and shipped production MERN web applications: admin panels for Thanima Hajj & Umrah and Hira+ — each with role-based access control (RBAC), full CRUD operations, and analytics dashboards
- Built an internal ERP system on the MERN stack for D4media; set up production infrastructure across DigitalOcean, Cloudways, and WHM/cPanel; implemented Shorebird OTA updates and GitHub Actions CI/CD organisation-wide

Junior Full-Stack Developer | D4DX Innovations LLP | Kozhikode, India Jul 2024 – Feb 2025

- Built the Tafheem ul Quran Flutter mobile app — custom audio streaming, prayer times, quizzes, and multi-language support — deployed to Google Play Store and Apple App Store, contributing to 30,000+ active users and a 4.5★ rating
- Reduced flagship app size by 60% (150 MB to 60 MB) through asset optimisation, code refactoring, and cloud migration — improved download conversion and reduced crash rate to 2.7%
- Shipped 5 production Flutter apps to both stores: Thanima Hajj & Umrah (GPS pilgrimage guide, offline-first), Zai Toon Kids (Razorpay subscriptions), Hira Plus, Muhasabah, and Mishkath – JIH Kerala
- Built a production RAG-based AI chatbot for Tafheem ul Quran using Python, ChromaDB, and Gemini LLM — enabling context-aware Q&A over Quranic content; live and deployed within the application
- Wrote Flutter widget and unit tests ensuring cross-release reliability; participated in formal Agile sprint reviews and weekly reporting cycles

Flutter Developer — Internship | IroHub Infotech Pvt. Ltd. | Ernakulam, India Mar 2023 – Sep 2023

- Built cross-platform mobile apps with Flutter and Dart over 6 months, shipping production-ready UI components and RESTful API integrations deployed to Google Play Store
- Implemented Provider state management and built reusable component libraries adopted across multiple project teams

PROJECTS

FloodScope — Python, XGBoost, SHAP, scikit-learn, PostGIS, FastAPI, React, Mapbox floodscope.junaidh.me

MSc dissertation project: explainable-ML geospatial flood-risk mapping for Dublin (Dodder, Tolka, Liffey catchments; 157,735-cell 50m grid). Shows that naive random-split evaluation overstates accuracy versus spatial block cross-validation (AUC -0.157 / F1 -0.400). Full-stack build with FastAPI on DigitalOcean, React/Mapbox on Netlify, and SHAP-based per-cell explanations. Griffith College Dublin — submission Sep 2026.

Transcribio — JavaScript, Node.js, Gemini API — Open Source github.com/junaidh-junu/transcribio

Published npm package for audio transcription with speaker detection, timestamps, 50+ language support, and SRT/VTT/JSON export. Ships a CLI tool and web UI for Node.js workflows.

newleafschool.org — React, Supabase, TypeScript newleafschool.org

School management site with events, notices, admin panel, and real-time updates.

EDUCATION

MSc in Computing Science — Griffith College Dublin, Ireland

Sep 2025 – Oct 2026 (Expected)

Scrum Master — MSc team project; applied Agile/Scrum using JIRA. Dissertation: FloodScope — explainable geospatial flood-risk ML for Dublin.

B.Tech in Computer Science and Engineering — APJ Abdul Kalam Technological University, India

Sep 2019 – Apr 2024

Jawaharlal College of Engineering and Technology, Kerala, India
